don't convert to flac as that also converts dsd to pcm which defeat

use sacd_extract to extract tracks – it should work fine on 64-bit O

You can find it here: http://code.google.com/p/sacd-.....loads/list

It is a stand alone commandline tool: type sacd_extract -h to see tl

It will split an SACD iso in separate tracks in dff format, JPlay can p
that can handle dff in DoP format.

it's a standalone utility and works only from command-line (ah, hor

it can extract individual tracks from DSD ISO in DFF or DSF format
jplay, yes

just type:

sacd_extract -2 -s -c -i"MyDSD.ISO"

ah aleg was faster :)

but hugson – do you have a DAC that can play DSD over PCM form

there aren't that many out there....

Thanks

Short answer is No.
SACD discs can only be ripped to iso by PS3 route.
What sometimes can be done is capturing the digital output of an S
extra gear to be able to do so.

Thanks, I think I just need to give up on the SACS. I dont have end
money and time at this point and will just concentrate on HighRez

In short, this is the absolute best computer audio sound I've heard to date. It is the closest to my highly re-engineered VRDS-NEO transport. Thank you for creating such pure and natural sounding computer audio application!

Alex Peychev, APL Hi-Fi

You did an excellent job!

Rainer Weber, Technical Director, Kaiser Acoustics

I've been using Jplay for some time now and the sound is really good, better than _other player_ and mac middle tier software, they are too smooth. Jplay is the best transport compared with all other pc / mac software. It squeezes all the details from the files and I can stress test my own ribbon tweeter (our patent) in R&D.

Ben Lau, VOLENT Audio

- I must say your transport is mind blowing work of art. It is the most radical approach on HDD file "transport" ever and believe me – it mops the floor with any CD spinner at any price. I dont know how you guys do it but I am sure I never heard my DAC playing so well.

Łukasz Fikus, LAMPIZATOR

A reference by which others will be measured.

John Kenny, Hiface Modifications
